FANTÁS instigated by Hilton McConnico

To recapture

and

NOW

more than ever, we need to recapture our dream and fantasy, in order to cultivate positive thoughts in everyday life and give meaning to moral values : nature, love, ethics, humanity, inventiveness, spirit, understanding. In order to make our life beautiful, let's all put dream and fantasy on top of our requirements and let's all engrave those values in our daily life.

The Instigator of the Manifesto to recapture dream and fantasy

Hilton McConnico – artist, storyteller, agitator – draws on the recipe of this Manifesto for numerous companies that are responsive to a clear-cut concept. As a "scenographer of life", his creation generates narrative scenography, unusual design objects, expressive graphism, mischievous words, architectures playing with colour and volume, optical effects and magical lighting... in two words, dream and fantasy.

Hilton McConnico's philosophy aspires at conceiving intimate and uncompromising worlds, communicating dreams and arousing new ones. For interior architecture, exhibition scenography as well as store windows, his objective is to build a complete work around objects and spaces, giving a predominant position to colour and poetry. The design of objects and furniture is the result of an altruistic and emotional process. The designer's personality is reflected in the illusion he creates and his care for details. In creating emotions, he opens wide the door to memorization and well-being.

The artist has recently founded his own company, Hilton McConnico Agency, integrating his DNA and his creative philosophy, located in his house in Bagnolet, close to Paris. It is composed of five professionals whose complementary skills enable them to respond rapidly to clients' and partners' demands, with accuracy and appropriate means.
